

## UFO High Bay Light UL

LLP-UFO-100/150/200/240-XX

### Description:

The light is designed without a reflector with thin, smooth lines, and an attractive appearance. The fixture is made of die-cast aluminum with numerous cooling fins to maximise the performance. The LEDs produce 130 lm/W. This lamp is IP65 rated, suitable for both indoor and outdoor use.

### Feature :

1. The light is suitable for commercial and industrial lighting applications;
2. IP65 rated for wet locations;
3. Aluminum profile tempered glass, can withstand high impact from basketballs and similar objects;
4. LEDs are arranged in a symmetric circle to efficiently distribute heat;
5. 130 lumens per watt;
6. CRI ≥80;
7. Compact shape, easy to install and transport;
8. Installation options : pendant installation, suspended hook installation, wall mount or ceiling mount, with U-shape rotating bracket;
9. 5 year warranty.

\* 02: Normal series

\* D02: 0-10V dimming series

\* S02: Microwave sensing series

\* PCB matching lens(LED Qty.: 100W:224pcs / 150W:350pcs / 200W:406pcs / 240W:476pcs)

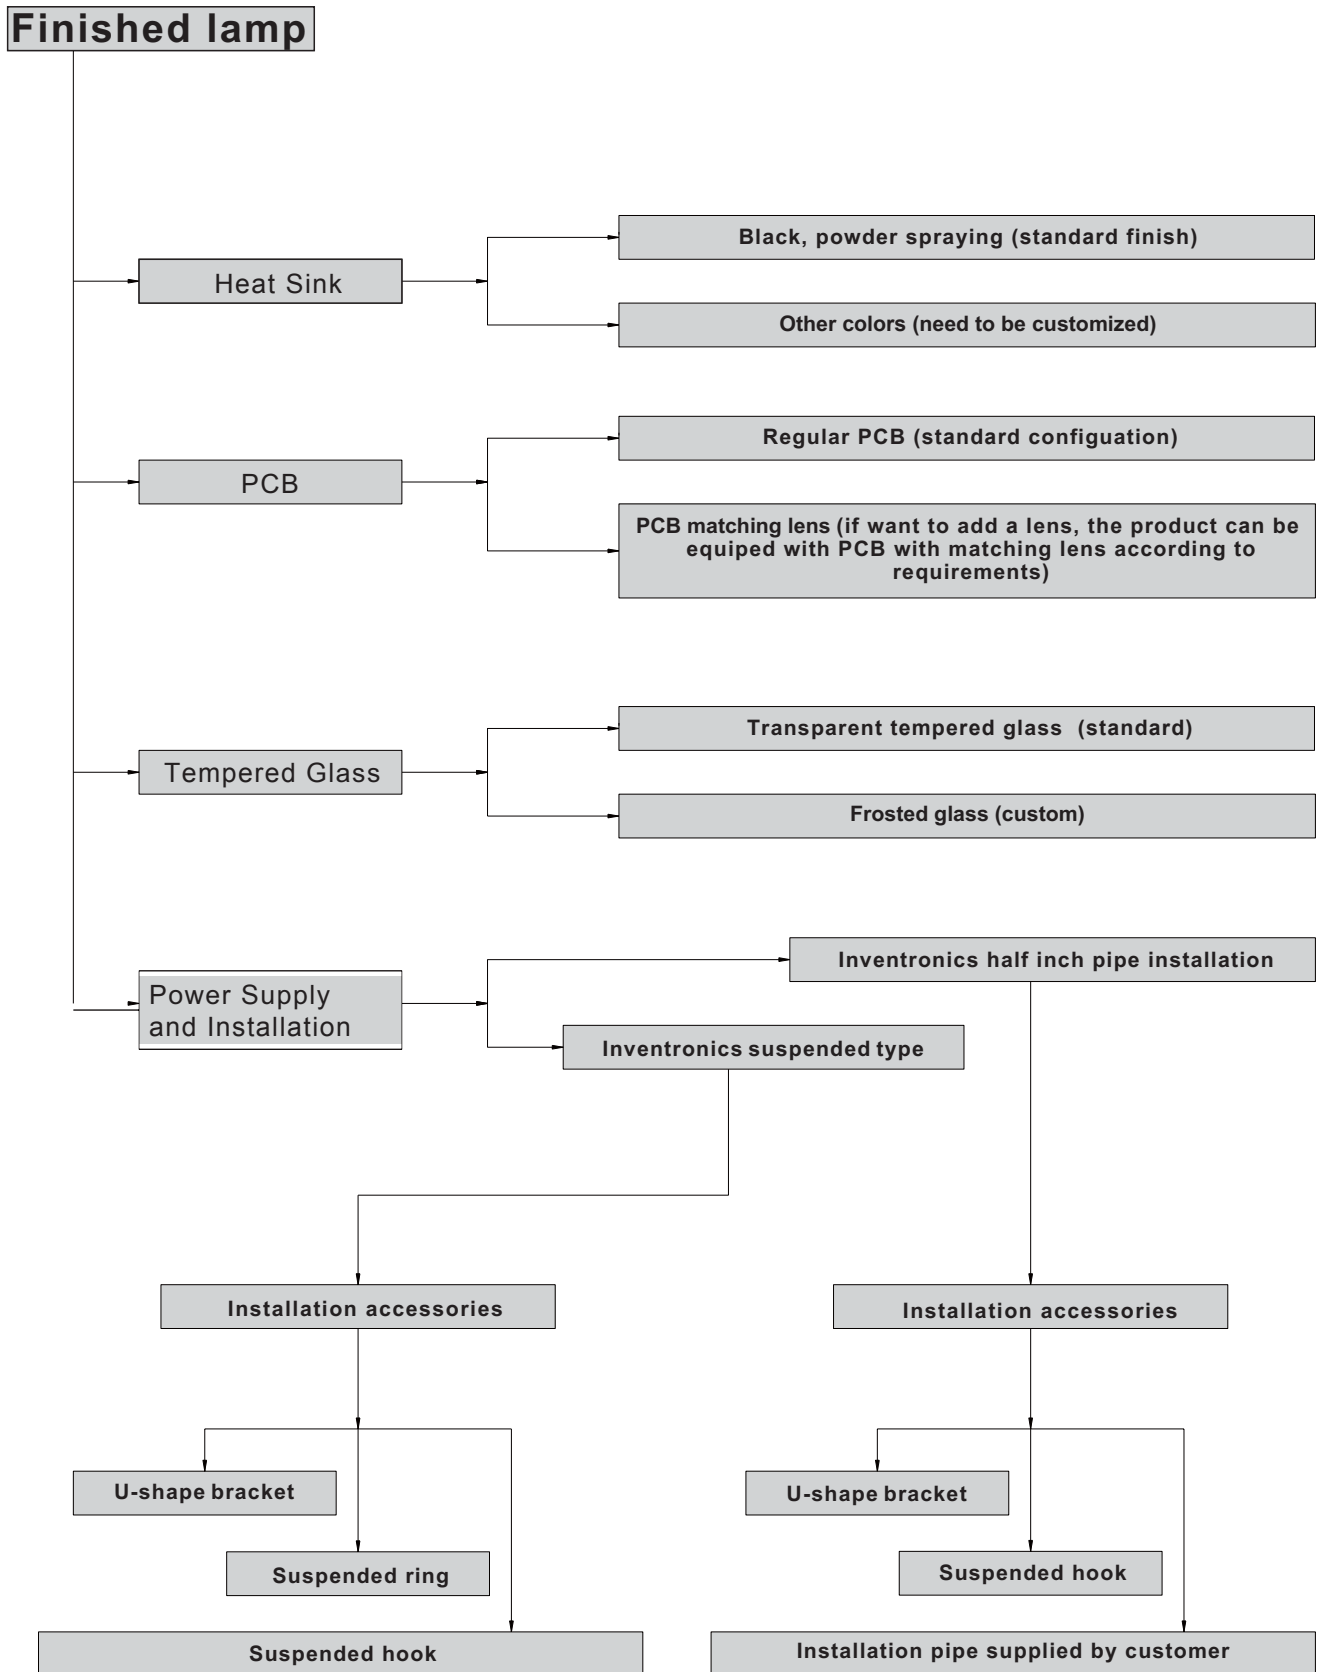

\* Lens: (Optional light angle:45deg / 90deg)

## Application:

Suitable for workshops , warehouses , parking lots , gymnasiums, aircraft hangars and manufacturing space.

## Configure navigation :

## Dimension(Unit:mm/inch):

### 100W (Normal or 0-10V dimming series )

### 150W (Normal or 0-10V dimming series)

### 200/240W (Normal or 0-10V dimming series)

### 100W (Microwave sensing series)

### 150W (Microwave sensing series)

### 200/240W (Microwave sensing series)

## Installation:

### Suspended installation

1. Please prepare one set of hangers, insert them into installation carrier in advance, and make sure the hangers and installation carrier meet weight requirement;
2. Screw ring into installation position of the fixture and tighten it;
3. Hook the fixture on hanger;

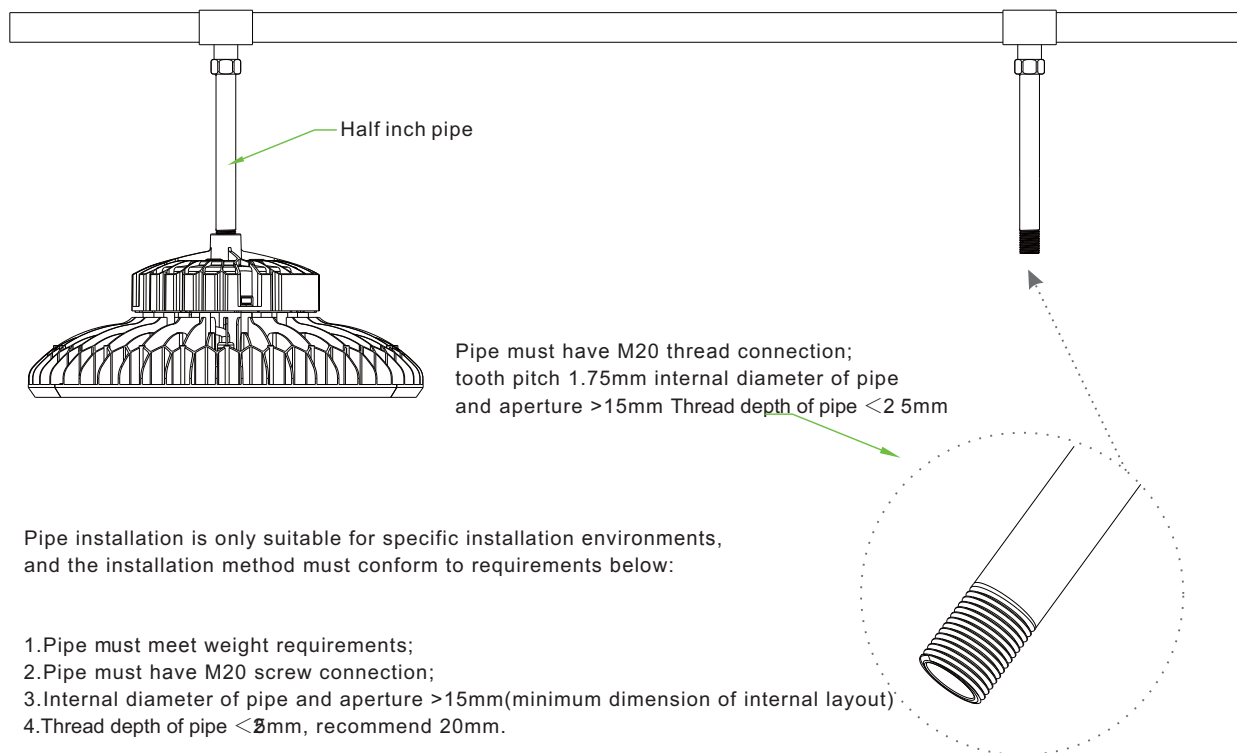

### Chain Installation

1. Prepare one set of hangers, screw them into installation carrier in advance, and make sure the hangers and installation carrier meet the weight requirements ;
2. Screw ring into threaded fixture, and tighten;
3. Add chain;
4. Hook one end of the chain to the fixture, and hook the other end on the hanger hook.

## Half inch pipe installation

## U-shape rotating bracket ceiling or wall installation

## Sensor function setting

By selecting the combination on the DIP switch, sensor data can be set for each specific application.

### Detection area

Detection area can be reduced by selecting the combination on the DIP switches to fit each application precisely.

Factory setting: 100%

### Hold time

Refers to the time period the lamp remains at 100% illumination after no motion is detected.

Factory setting: 3min

### Stand-by period

Refers to the time period the lamp remains at a low light level before it completely switches off after a long absence of motion. When set to “+∞” mode, the low light is maintained until motion is detected.

Factory setting: 5S

### Daylight sensor

The sensor can be set to allow the lamp to illuminate below a defined ambient brightness threshold. When set to disable mode, the daylight sensor will switch on the lamp when motion is detected regardless of ambient level. Note that daylight sensor is active only when lamp is switched off.

Factory setting: Disabled

### Stand-by dimming level

The low light level you would like to have after a long absence of motion.

Factory setting: 20%

## Installation requirements:

1. Turn power off before installation, and read the instructions carefully;
2. Make sure the installation material is rated for the lamp weight;
3. When installing with the suspension ring, first fix the suspension ring on the lamp securely, and hook the suspension bracket to the hanger;
4. Rotating bracket installation method; prepare two sets of expansion bolts, and drill holes in the installation body, then install the lamp, finally screw down expansion bolts and bracket screws.
5. Suspension installation; prepare extension material first, and cover one end of extension medium on suspension ring of the fixture, then hook the other end on the hanger hook.
6. Connect lamp wires to the matched power supply wires .
7. Installation must comply with local building codes.

## Notice:

1. Please first read the product specification carefully, make sure the environment conforms to specifications
2. Please confirm the input voltage before use
3. This product must be installed by a licensed electrician
