

Product of choice for a multitude of residential, commercial and industrial lighting applications, our transformer is the **most efficient compact-sized lighting transformer** on the market today. Rated for both outdoor and indoor use, our solution is designed to respond to the lighting industry's new energy and reliability requirements.

24 V  
DC

INDOOR/  
OUTDOOR

DIMMABLE

MADE  
IN NORTH  
AMERICA

NEMA 3R  
ENCLOSURE

### FEATURES

- 1 Compact and lightweight**  
Easy to integrate into any application or design
- 2 Industry-leading technology**  
Designed for longest operational hours
- 3 Dual protection**  
Two circuit breaker protection levels on the primary and secondary winding, to protect both load and transformer
- 4 NEMA 3R Enclosure**  
High-quality metal case designed to withstand the toughest environments, including humid conditions
- 5 Junction box**  
Integrated junction box with knocks-outs and hinged door for clean, safe and easy installation

### FORMAT

24 V DC LIGHTING TRANSFORMER

### SPECIFICATIONS\*

Max Load	150 W
Input Voltage	120 V
Output Type	DC
Output Voltage Open Circuit	25.5 V / 27.6 V with Boost
Output Voltage Full Load	23.0 V / 24.1 V with Boost
Input Current Full Load	1.49 A
Output Current Full Load	6.52 A
Efficiency	84 %
Thermal Class	B130 °C
Leads Primary	PVC 600 V #18
Leads Secondary	PVC 600 V #12
Circuit Breaker	Primary & Secondary Manual Reset
Dimensions (L*W*H) with Bracket	9.6 x 4.6 x 2.4 inches
Bracket (L)	1.3 inches

\*The specifications are subject to change without notice.

**THE MOST EFFICIENT COMPACT-SIZED SOLUTION ON THE MARKET**

- High-performance North-American made lighting transformer
- Superior product reliability
- Increased energy efficiency
- Enhanced dimming stability
